## Professional summary

I'm a computer science master's graduate with 3.5 years of professional experience. Skilled in problem-solving, proficient in multiple programming languages, and committed to staying updated with tech trends. I'm eager to contribute to innovative teams and companies.

## Work history

### Senior Software Developer

04/2022 - 08/2022

#### ServiceNet Technologies

- Collaborated with the client to understand project requirements and actively contributed to the initial project architecture design
- Engaged with product managers to design and architect the project
- Facilitated effective teamwork, ensuring project completion within the stipulated timeframe while efficiently distributing tasks among the team members.
- Engineered a product scheme management web app with Python/Django, Ajax, and MySQL, facilitating dealer orders and enhancing admin oversight.
- Contributed to CCTV monitoring app development, integrating CCTV footage with Python/Django, AWS, S3, MySQL, and AWS Media Services using Boto3.

### Data Analyst

01/2020 - 06/2021

#### enexion Energy

- Automated analysis of MSCONS/UDP meter data files using Python and pywin32, creating an internal tool for efficient processing.
- Developed a data manipulation tool with Python, SQL, Pandas, and Matplotlib for insightful visualization of energy usage and anomalies in the German energy market.

### Python developer

06/2019 - 01/2020

#### Upsert Technologies

- Developed a dynamic e-commerce platform using Python, Django, and AWS for wholesale refurbished product sales. Implemented AJAX and JavaScript for interactive UI. Ensured robust data management with SQL. Collaborated cross-functionally, optimized code for scalability, and provided comprehensive documentation. Contributed to a seamless and efficient user experience.

### Intern

11/2018 - 02/2019

#### FUEL

- Conducted student interviews at high schools, offering career counseling and guidance.
- Contributed to exploratory data analysis involving data from over 1 million students in Maharashtra state

## Skills

- Linux, Python (Django), REST API
- HTML5, CSS, JavaScript (jQuery), and AJAX
- Java
- AWS (S3, Media Services, EC2), Docker, Git
- SQL (MySQL, PostgreSQL)
- CI/CD

## Education

### MSc: Computer Science

09/2023

**Nottingham Trent University** - Nottingham, United Kingdom

### B.E: Computer Engineering

05/2019

**Savitribai Phule Pune University** - Pune, India

## Certifications

Python Programming - Microsoft

Data Science - Kelly Institute
